

Combi ovens for passion

XT BOXTOR

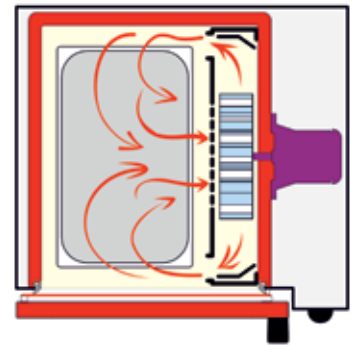

A step forward for Inoxtrend, all the heat remains in the oven!

In traditional systems, the oven cooking chamber and deflector are the technical parts which direct hot air onto the food. Problem: ovens can be complex and parts difficult to access. With **XT BOXTOR**® technology, thanks to an exclusive rotatable and removable conveyor® which directs hot air onto the food, the problem is solved: the oven is linear and the parts easy to inspect.

TRADITIONAL SYSTEM
