

Combi ovens for passion

# XT MULTI CLEANER

The Multi Cleaner® tablet washing system is standard in the models with programmable controls. XT COMPACT, state-of-the-art ovens: compact, easy to clean and outstanding performers!

Cutting-edge technology for an auto cleaning system which washes the oven with **DETABINOX**®. Guarantees a spotlessly clean oven at the end of the working cycle, without the need for supervision. Models with a steam generator also come with a powder **DISPOINOX**® to remove limescale and keep the boiler working efficiently.

**XT MULTI CLEANER**® uses technology designed to give chefs a helping hand in the kitchen and, at the end of the day, guarantees maximum oven hygiene and, as a result, unbeatable food safety. The rotating washing and rinsing system is built into the oven, so there is no need for extra accessories. The air and water combination from the fan, along with the rotating action, ensure the detergent gets into every corner of the oven.
